# PEDESTALS

## PRODUCT FEATURES

A well designed pedestal head and stand plays an important role in the security and access control for automatic gate systems.

In addition to stopping unwanted entry, these access control pedestals provide a strong mounting solution for keypads, card readers, intercoms, security cameras, and other security and access control entry devices for gates, leaving your location protected at all times.

With removable face plates and tamper proof hardware, our polycarbonate pedestal heads are designed with ease of installation in mind.

## TECHNICAL SPECS

- 40" Pedestal Stand is the most common for pedestrian, car, and pad mount handicap (ADIA) compliant specifications
- 88" Pedestal Stand is made for semi trucks and buses
- Dual option and custom height stands available
- Large and small polycarbonate heads are available
